

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended May 31, 2024

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number: 1-31420

CARMAX, INC.

(Exact name of registrant as specified in its charter)

Virginia
(State or other jurisdiction of incorporation)

54-1821055
(I.R.S. Employer Identification No.)

12800 Tuckahoe Creek Parkway
Richmond, Virginia
(Address of Principal Executive Offices)

23238
(Zip Code)

(804) 747-0422
(Registrant's telephone number, including area code)

N/A
(Former name, former address and former fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Trading Symbol(s)</u>	<u>Name of each exchange on which registered</u>
Common Stock	KMX	New York Stock Exchange

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

CARMAX, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements
(Unaudited)

1. Background

Business. CarMax, Inc. (“we,” “our,” “us,” “CarMax” and “the company”), including its wholly owned subsidiaries, is the nation’s largest retailer of used vehicles. We operate in two reportable segments: CarMax Sales Operations and CarMax Auto Finance (“CAF”). Our CarMax Sales Operations segment consists of all aspects of our auto merchandising and service operations, excluding financing provided by CAF. Our CAF segment consists solely of our own finance operation that provides financing to customers buying retail vehicles from CarMax.

On June 1, 2021, we completed the acquisition of Edmunds Holding Company (“Edmunds”). At that time, Edmunds was identified as a non-reportable operating segment and has been presented as “Other” in the Segment Information footnote in our prior period financial statements. Since the acquisition, Edmunds’ business strategy has become increasingly integrated with that of CarMax Sales Operations. Beginning in the first quarter of fiscal 2025, the chief operating decision maker (“CODM”) assessed the financial performance related to Edmunds’ operations together with the rest of the CarMax Sales Operations segment. As a result, as of May 31, 2024, the company realigned its operating segments to be consistent with the manner in which the CODM assesses performance and makes resource allocations. The company now operates in two operating segments, CarMax Sales Operations and CAF, both of which continue to be reportable segments.

The operating segment change did not impact the company’s consolidated financial statements but did impact our previous segment footnote disclosure. The Segment Information footnote is no longer presented, as the previous disclosures were for the purpose of presenting the Edmunds operating segment separate from CarMax Sales Operations. The current and prior period required disclosures related to our reportable segments are included elsewhere within the consolidated financial statements and related footnotes. The performance of our CarMax Sales Operations segment is reviewed by our CODM at the gross profit level, the components of which are presented within the consolidated statement of earnings. The required segment information related to our CAF segment is presented in Note 3. Additionally, asset information by segment is not utilized for purposes of assessing performance or allocating resources and, as a result, such information has not been presented.

We deliver an unrivaled customer experience by offering a broad selection of quality used vehicles and related products and services at competitive, no-haggle prices using a customer-friendly sales process. Our omni-channel platform, which gives us the largest addressable market in the used car industry, empowers our retail customers to buy a car on their terms – online, in-store or an integrated combination of both. We offer customers a range of related products and services, including the appraisal and purchase of vehicles directly from consumers; the financing of retail vehicle purchases through CAF and third-party finance providers; the sale of extended protection plan (“EPP”) products, which include extended service plans (“ESPs”) and guaranteed asset protection (“GAP”); advertising and subscription services; and vehicle repair service. Vehicles purchased through the appraisal process that do not meet our retail standards are sold to licensed dealers through on-site or virtual wholesale auctions.

Basis of Presentation and Use of Estimates. The accompanying interim unaudited consolidated financial statements include the accounts of CarMax and our wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. These interim unaudited consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (“GAAP”) for interim financial information. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, such interim consolidated financial statements reflect all normal recurring adjustments considered necessary to present fairly the financial position and the results of operations and cash flows for the interim periods presented. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the full fiscal year.

The accounting policies followed in the presentation of our interim financial results are consistent with those included in the company’s Annual Report on Form 10-K for the fiscal year ended February 29, 2024 (the “2024 Annual Report”), with the exception of those related to recent accounting pronouncements adopted in the current fiscal year. These interim unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and footnotes included in our 2024 Annual Report.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates. Certain prior year amounts have been reclassified to conform to the current year’s presentation. Amounts and percentages may not total due to rounding.

Recent Accounting Pronouncements.

Adopted in the Current Period

In June 2022, the Financial Accounting Standards Board (“FASB”) issued an accounting pronouncement (ASU 2022-03) related to accounting for equity securities. The amendments in the update clarify the guidance for measuring the fair value of equity securities subject to contractual restrictions that prohibit the sale of equity securities, as well as introduce new disclosure requirements for equity securities subject to contractual sale restrictions that are measured at fair value. This update is effective for annual periods beginning after December 15, 2023, and interim periods within those fiscal years. We adopted this pronouncement for our fiscal year beginning March 1, 2024, and it did not have a material effect on our consolidated financial statements.

In March 2023, the FASB issued an accounting pronouncement (ASU 2023-01) related to accounting for leases between entities under common control. The amendments in this update that apply to public business entities clarify the accounting for leasehold improvements associated with common control leases. This update is effective for fiscal years beginning after December 15, 2023, including interim periods within those fiscal years. We adopted this pronouncement for our fiscal year beginning March 1, 2024, and it did not have a material effect on our consolidated financial statements.

In March 2023, the FASB issued an accounting pronouncement (ASU 2023-02) related to accounting for investments in tax credit structures using the proportional amortization method. The amendments in this update permit reporting entities to elect to account for their tax equity investments, regardless of the tax credit program from which the income tax credits are received, using the proportional amortization method if certain conditions are met. This update is effective for fiscal years beginning after December 15, 2023, including interim periods within those fiscal years. We adopted this pronouncement for our fiscal year beginning March 1, 2024, and it did not have a material effect on our consolidated financial statements.

2. Revenue

We recognize revenue when control of the good or service has been transferred to the customer, generally either at the time of sale or upon delivery to a customer. Our contracts have a fixed contract price and revenue is measured as the amount of consideration we expect to receive in exchange for transferring goods or providing services. We collect sales taxes and other taxes from customers on behalf of governmental authorities at the time of sale. These taxes are accounted for on a net basis and are not included in net sales and operating revenues or cost of sales. We generally expense sales commissions when incurred because the amortization period would have been less than one year. These costs are recorded within selling, general and administrative expenses. We do not have any significant payment terms as payment is received at or shortly after the point of sale.

Disaggregation of Revenue

<i>(In millions)</i>	Three Months Ended May 31	
	2024	2023
Used vehicle sales	\$ 5,677.5	\$ 6,001.5
Wholesale vehicle sales	1,256.4	1,514.4
Other sales and revenues:		
Extended protection plan revenues	118.8	111.2
Third-party finance (fees)/income, net	(1.7)	0.3
Advertising & subscription revenues ⁽¹⁾	34.7	31.4
Service revenues	22.7	22.1
Other	5.0	6.2
Total other sales and revenues	179.5	171.2
Total net sales and operating revenues	\$ 7,113.4	\$ 7,687.1

⁽¹⁾ Excludes intercompany sales and operating revenues that have been eliminated in consolidation.

Used Vehicle Sales. Revenue from the sale of used vehicles is recognized upon transfer of control of the vehicle to the customer. As part of our customer service strategy, we guarantee the retail vehicles we sell with a 10-day money-back guarantee. We record a reserve for estimated returns based on historical experience and trends. The reserve for estimated returns is presented gross on the consolidated balance sheets, with a return asset recorded in other current assets and a refund liability recorded in accrued expenses and other current liabilities. We also guarantee the used vehicles we sell with a 90-

day/4,000-mile limited warranty. These warranties are deemed assurance-type warranties and are accounted for as warranty obligations. See Note 15 for additional information on this warranty and its related obligation.

Wholesale Vehicle Sales. Wholesale vehicles are sold at our auctions, and revenue from the sale of these vehicles is recognized upon transfer of control of the vehicle to the customer. Dealers also pay a fee to us based on the sale price of the vehicles they purchase. This fee is recognized as revenue at the time of sale. While we provide condition disclosures on each wholesale vehicle sold, the vehicles are subject to a limited right of return. We record a reserve for estimated returns based on historical experience and trends. The reserve for estimated returns is presented gross on the consolidated balance sheets, with a return asset recorded in other current assets and a refund liability recorded in accrued expenses and other current liabilities.

EPP Revenues. We also sell ESP and GAP products on behalf of unrelated third parties, who are primarily responsible for fulfilling the contract, to customers who purchase a retail vehicle. The ESPs we currently offer on all used vehicles provide coverage up to 60 months (subject to mileage limitations), while GAP covers the customer for the term of their finance contract. We recognize revenue, on a net basis, at the time of sale. We also record a reserve, or refund liability, for estimated contract cancellations. The reserve for cancellations is evaluated for each product and is based on forecasted forward cancellation curves utilizing historical experience, recent trends and credit mix of the customer base. Our risk related to contract cancellations is limited to the revenue that we receive. Cancellations fluctuate depending on the volume of EPP sales, customer financing default or prepayment rates, and shifts in customer behavior, including those related to changes in the coverage or term of the product. The current portion of estimated cancellation reserves is recognized as a component of accrued expenses and other current liabilities with the remaining amount recognized in other liabilities. See Note 7 for additional information on cancellation reserves.

We are contractually entitled to receive profit-sharing revenues based on the performance of the ESPs administered by third parties. These revenues are a form of variable consideration included in EPP revenues to the extent that it is probable that it will not result in a significant revenue reversal. An estimate of the amount to which we expect to be entitled is determined upon satisfying the performance obligation of selling the ESP. This estimate is subject to various constraints; primarily, factors that are outside of the company's influence or control. We have determined that these constraints generally preclude any profit-sharing revenues from being recognized before they are paid. As of May 31, 2024 and February 29, 2024, no current or long-term contract asset was recognized related to cumulative profit-sharing payments to which we expect to be entitled. The estimate of the amount to which we expect to be entitled is reassessed each reporting period and any changes are reflected in other sales and revenues on our consolidated statements of earnings and other assets on our consolidated balance sheets.

Third-Party Finance (Fees)/Income. Customers applying for financing who are not approved or are conditionally approved by CAF are generally evaluated by other third-party finance providers. These providers generally either pay us or are paid a fixed, pre-negotiated fee per contract. We recognize these fees at the time of sale.

Advertising and Subscription Revenues. Advertising and subscription revenues consist of revenues earned by our Edmunds business. Advertising revenues are derived from advertising contracts with automotive manufacturers based on fixed fees per impression and fees for certain activities completed by customers on the manufacturers' websites. These fees are recognized in the period the impressions are delivered or certain activities occurred. Subscription revenues are derived from packages sold to automotive dealers that include car leads, inventory listings and enhanced placement in Edmunds' dealer locator and are recognized over the period that the services are made available to the dealers. Subscription revenues also include a digital marketing subscription service, which allows dealers to gain exposure on third party partner websites. Revenues for this service are recognized on a net basis.

Service Revenues. Service revenue consists of labor and parts income related to vehicle repair service, including repairs of vehicles covered under an ESP we sell or warranty program. Service revenue is recognized at the time the work is completed.

Other Revenues. Other revenues include miscellaneous goods and services, which are immaterial to our consolidated financial statements.

3. CarMax Auto Finance

CAF provides financing to qualified retail customers purchasing vehicles from CarMax. CAF provides us the opportunity to capture additional profits, cash flows and sales while managing our reliance on third-party finance sources. Management regularly analyzes CAF's operating results by assessing profitability, the performance of the auto loans receivable, including trends in credit losses and delinquencies, and CAF direct expenses. This information is used to assess CAF's performance and make operating decisions, including resource allocation.

We typically use securitizations or other funding arrangements to fund loans originated by CAF. CAF income primarily reflects the interest and fee income generated by the auto loans receivable less the interest expense associated with the debt issued to fund these receivables, a provision for estimated loan losses and direct CAF expenses.

CAF income does not include any allocation of indirect costs. Although CAF benefits from certain indirect overhead expenditures, we have not allocated indirect costs to CAF to avoid making subjective allocation decisions. Examples of indirect costs not allocated to CAF include retail store expenses and corporate expenses. In addition, except for auto loans receivable, which are disclosed in Note 4, CAF assets are not separately reported nor do we allocate assets to CAF because such allocation would not be useful to management in making operating decisions.

⁽¹⁾ Annualized percentage of total average managed receivables.

4. Auto Loans Receivable

Auto loans receivable include amounts due from customers related to retail vehicle sales financed through CAF and are presented net of an allowance for estimated loan losses. These auto loans represent a large group of smaller-balance homogeneous loans, which we consider to be part of one class of financing receivable and one portfolio segment for purposes of determining our allowance for loan losses. We generally use warehouse facilities to fund auto loans receivable originated by CAF until we elect to fund them through an asset-backed term funding transaction, such as a term securitization or alternative funding arrangement. We recognize transfers of auto loans receivable into the warehouse facilities and asset-backed term funding transactions (together, “non-recourse funding vehicles”) as secured borrowings, which result in recording the auto loans receivable and the related non-recourse notes payable on our consolidated balance sheets. The majority of the auto loans receivable serve as collateral for the related non-recourse notes payable of \$17.17 billion as of May 31, 2024, and \$16.87 billion as of February 29, 2024. See Note 9 for additional information on securitizations and non-recourse notes payable.

Interest income and expenses related to auto loans are included in CAF income. Interest income on auto loans receivable is recognized when earned based on contractual loan terms. All loans continue to accrue interest until repayment or charge-off. When a charge-off occurs, accrued interest is written off by reversing interest income. Direct costs associated with loan originations are not considered material, and thus, are expensed as incurred. See Note 3 for additional information on CAF income.

Auto Loans Receivable, Net

<i>(In millions)</i>	As of May 31 2024	As of February 29 2024
Asset-backed term funding	\$ 12,475.5	\$ 12,638.2
Warehouse facilities	4,176.6	3,744.6
Overcollateralization ⁽¹⁾	813.2	790.9

Auto loans receivable, net	\$ 17,268.3	\$ 17,011.8

⁽¹⁾ Represents receivables restricted as excess collateral for the non-recourse funding vehicles.

⁽²⁾ Other managed receivables includes receivables not funded through the non-recourse funding vehicles.

Credit Quality. When customers apply for financing, CAF's proprietary scoring models utilize the customers' credit history and certain application information to evaluate and rank their risk. We obtain credit histories and other credit data that includes information such as number, age, type of and payment history for prior or existing credit accounts. The application information that is used includes income, collateral value and down payment. The scoring models yield credit grades that represent the relative likelihood of repayment. Customers with the highest probability of repayment are A-grade customers. Customers assigned a lower grade are determined to have a lower probability of repayment. For loans that are approved, the credit grade influences the terms of the agreement, such as the required loan-to-value ratio and interest rate. After origination, credit grades are generally not updated.

CAF uses a combination of the initial credit grades and historical performance to monitor the credit quality of the auto loans receivable on an ongoing basis. We validate the accuracy of the scoring models periodically. Loan performance is reviewed on a recurring basis to identify whether the assigned grades adequately reflect the customers' likelihood of repayment.

⁽³⁾ Represents CAF's Tier 1 originations.

⁽⁴⁾ Represents CAF's Tier 2 and Tier 3 originations.

Allowance for Loan Losses. The allowance for loan losses at May 31, 2024 represents the net credit losses expected over the remaining contractual life of our managed receivables. The allowance for loan losses is determined using a net loss timing curve method ("method"), primarily based on the composition of the portfolio of managed receivables and historical gross loss and recovery trends. Due to the fact that losses for receivables with less than 18 months of performance history can be volatile, our net loss estimate weights both historical losses by credit grade at origination and actual loss data on the receivables to-date, along with forward loss curves, in estimating future performance. Once the receivables have 18 months of performance history, the net loss estimate reflects actual loss experience of those receivables to-date, along with forward loss curves, to predict future performance. The forward loss curves are constructed using historical performance data and show the average timing of losses over the course of a receivable's life. The net loss estimate is calculated by applying the loss rates developed using the methods described above to the amortized cost basis of the managed receivables at inception of the loan.

The output of the method is adjusted to take into account reasonable and supportable forecasts about the future. Specifically, the change in U.S. unemployment rates and the National Automobile Dealers Association used vehicle price index are used to predict changes in gross loss and recovery rates, respectively. An economic adjustment factor, based upon a single macroeconomic scenario, is developed to capture the relationship between changes in these forecasts and changes in gross loss and recovery rates. This factor is applied to the output of the method for the reasonable and supportable forecast period of two years. After the end of this two-year period, we revert to historical experience on a straight-line basis over a period of 12 months. We periodically consider whether the use of alternative metrics would result in improved model performance and revise the models when appropriate. We also consider whether qualitative adjustments are necessary for factors that are not reflected in the quantitative methods but impact the measurement of estimated credit losses. Such adjustments include the uncertainty of the impacts of recent economic trends on customer behavior. The change in the allowance for loan losses is recognized through an adjustment to the provision for loan losses.

Allowance for Loan Losses

<i>(In millions)</i>	Three Months Ended May 31, 2024				% ⁽¹⁾
	Core	Other	Total		
Balance as of beginning of period	\$ 389.7	\$ 93.1	\$ 482.8		2.78

Charge-offs	(93.1)	(16.7)	(109.8)		
Recoveries ⁽²⁾	50.5	6.6	57.1		
Provision for loan losses	68.6	12.3	80.9		
Balance as of end of period	\$ 427.5	\$ 107.9	\$ 535.4		3.11

⁽¹⁾ Percent of total ending managed receivables.

⁽²⁾ Net of costs incurred to recover vehicle.

During the first three months of fiscal 2025, the allowance for loan losses as a percent of total ending managed receivables increased by 1 basis point. The increase was primarily due to CAF's expanded investment in Tier 2, partially offset by the previously implemented tightened underwriting standards in response to the current environment. The increase in net charge-offs primarily reflects continued customer hardship in the current economic environment. The allowance for loan losses as of May 31, 2024 reflects our best estimate of expected future losses based on recent trends in delinquencies, loss performance, recovery rates and the economic environment.

Past Due Receivables. An account is considered delinquent when the related customer fails to make a substantial portion of a scheduled payment on or before the due date. In general, accounts are charged-off on the last business day of the month during which the earliest of the following occurs: the receivable is 120 days or more delinquent as of the last business day of the month, the related vehicle is repossessed and liquidated, or the receivable is otherwise deemed uncollectable. For purposes of determining impairment, auto loans are evaluated collectively, as they represent a large group of smaller-balance homogeneous loans, and therefore, are not individually evaluated for impairment.

5. Derivative Instruments and Hedging Activities

We use derivatives to manage certain risks arising from both our business operations and economic conditions, particularly with regard to issuances of debt. Primary exposures include SOFR and other rates used as benchmarks in our securitizations and other debt financing. We enter into derivative instruments to manage exposures related to the future known receipt or payment of uncertain cash amounts, the values of which are impacted by interest rates, and generally designate these derivative instruments as cash flow hedges for accounting purposes. In certain cases, we may choose not to designate a derivative instrument as a cash flow hedge for accounting purposes due to uncertainty around the probability that future hedged transactions will occur. Our derivative instruments are used to manage (i) differences in the amount of our known or expected cash receipts and our known or expected cash payments principally related to the funding of our auto loans receivable, and (ii) exposure to variable interest rates associated with our term loans.

For the derivatives associated with our non-recourse funding vehicles that are designated as cash flow hedges, the changes in fair value are initially recorded in accumulated other comprehensive income (“AOCI”). For the majority of these derivatives, the amounts are subsequently reclassified into CAF income in the period that the hedged forecasted transaction affects earnings, which occurs as interest expense is recognized on those future issuances of debt. During the next 12 months, we estimate that an additional \$51.7 million will be reclassified from AOCI as an increase to CAF income. Changes in fair value related to derivatives that have not been designated as cash flow hedges for accounting purposes are recognized in the income statement in the period in which the change occurs. For the three months ended May 31, 2024, we recognized expense of \$3.2 million in CAF income representing these changes in fair value.

As of May 31, 2024 and February 29, 2024, we had interest rate swaps outstanding with a combined notional amount of \$4.99 billion and \$5.21 billion, respectively, that were designated as cash flow hedges of interest rate risk. As of May 31, 2024 and February 29, 2024, we had interest rate swaps with a combined notional amount of \$529.0 million and \$704.0 million, respectively, outstanding that were not designated as cash flow hedges for accounting purposes.

See Note 6 for discussion of fair values of financial instruments and Note 12 for the effect on comprehensive income.

6. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal market or, if none exists, the most advantageous market, for the specific asset or liability at the measurement date (referred to as the “exit price”). The fair value should be based on assumptions that market participants would use, including a consideration of nonperformance risk.

We assess the inputs used to measure fair value using the three-tier hierarchy. The hierarchy indicates the extent to which inputs used in measuring fair value are observable in the market.

Level 1 Inputs include unadjusted quoted prices in active markets for identical assets or liabilities that we can access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets in active markets, quoted prices from identical or similar assets in inactive markets, observable inputs, such as interest rates and yield curves, and assumptions about risk.

Level 3 Inputs that are significant to the measurement that are not observable in the market and include management's judgments about the assumptions market participants would use in pricing the asset or liability (including assumptions about risk).

Our fair value processes include controls that are designed to ensure that fair values are appropriate. Such controls include model validation, review of key model inputs, analysis of period-over-period fluctuations and reviews by senior management.

Valuation Methodologies

Money Market Securities. Money market securities are cash equivalents, which are included in cash and cash equivalents, restricted cash from collections on auto loans receivable and other assets. They consist of highly liquid investments with original maturities of three months or less and are classified as Level 1.

Mutual Fund Investments. Mutual fund investments consist of publicly traded mutual funds that primarily include diversified equity investments in large-, mid- and small-cap domestic and international companies or investment grade debt securities. The investments, which are included in other assets, are held in a rabbi trust established to fund informally our executive deferred compensation plan and are classified as Level 1.

Derivative Instruments. The fair values of our derivative instruments are included in either other current assets, other assets, accounts payable or other liabilities. Our derivatives are not exchange-traded and are over-the-counter customized derivative instruments. All of our derivative exposures are with highly rated bank counterparties.

We measure derivative fair values assuming that the unit of account is an individual derivative instrument and that derivatives are sold or transferred on a stand-alone basis. We estimate the fair value of our derivatives using quotes determined by the derivative counterparties and third-party valuation services. Quotes from third-party valuation services and quotes received from bank counterparties project future cash flows and discount the future amounts to a present value using market-based expectations for interest rates and the contractual terms of the derivative instruments. The models do not require significant judgment and model inputs can typically be observed in a liquid market; however, because the models include inputs other than quoted prices in active markets, all derivatives are classified as Level 2.

Our derivative fair value measurements consider assumptions about counterparty and our own nonperformance risk. We monitor counterparty and our own nonperformance risk and, in the event that we determine that a party is unlikely to perform under terms of the contract, we would adjust the derivative fair value to reflect the nonperformance risk.

Items Measured at Fair Value on a Recurring Basis

Fair Value of Financial Instruments

The carrying value of our cash and cash equivalents, accounts receivable, other restricted cash deposits and accounts payable approximates fair value due to the short-term nature and/or variable rates associated with these financial instruments. Auto loans receivable are presented net of an allowance for estimated loan losses, which we believe approximates fair value. We believe that the carrying value of our revolving credit facility and term loans approximates fair value due to the variable rates associated with these obligations. The fair value of our senior unsecured notes, which are not carried at fair value on our consolidated balance sheets, was determined using Level 2 inputs based on quoted market prices. The carrying value and fair value of the senior unsecured notes as of May 31, 2024 and February 29, 2024, respectively, are as follows:

<i>(In thousands)</i>	As of May 31, 2024		As of February 29, 2024	
Carrying value	\$	400,000	\$	400,000
Fair value	\$	380,320	\$	380,249

7. Cancellation Reserves

We recognize revenue for EPP products, on a net basis, at the time of sale. We also record a reserve, or refund liability, for estimated contract cancellations. Cancellations of these services may result from early termination by the customer, or default or prepayment on the finance contract. The reserve for cancellations is evaluated for each product and is based on forecasted forward cancellation curves utilizing historical experience, recent trends and credit mix of the customer base.

Cancellation Reserves

<i>(In millions)</i>	Three Months Ended May 31	
	2024	2023
Balance as of beginning of period	\$ 128.3	\$ 139.2
Cancellations	(21.3)	(24.6)
Provision for future cancellations	24.3	24.1
Balance as of end of period	\$ 131.3	\$ 138.7

The current portion of estimated cancellation reserves is recognized as a component of accrued expenses and other current liabilities with the remaining amount recognized in other liabilities. As of May 31, 2024 and February 29, 2024, the current portion of cancellation reserves was \$70.9 million and \$69.7 million, respectively.

8. Income Taxes

We had \$30.0 million of gross unrecognized tax benefits as of May 31, 2024, and \$28.8 million as of February 29, 2024. There were no significant changes to the gross unrecognized tax benefits as reported for the fiscal year ended February 29, 2024.

Within the next 12 months, it is reasonably possible that statutes will expire and previously unrecognized tax benefits related to the prepayment of services provided by related entities will be recognized. Recognition of the benefits will decrease gross unrecognized tax benefits by approximately \$14.0 million and would not materially impact our effective tax rate.

9. Debt

(In thousands)

<u>Debt Description</u> ⁽¹⁾	<u>Maturity Date</u>	<u>As of May 31</u> <u>2024</u>	<u>As of February 29</u> <u>2024</u>

Less: unamortized debt issuance costs		(26,579)	(26,044)
Long-term debt, net		\$ 18,217,377	\$ 17,959,656

⁽¹⁾ Interest is payable monthly, with the exception of our senior notes, which are payable semi-annually.

⁽²⁾ Borrowings accrue interest at variable rates based on SOFR, the federal funds rate, or the prime rate, depending on the type of borrowing.

Revolving Credit Facility. Borrowings under our \$2.00 billion unsecured revolving credit facility (the “credit facility”) are available for working capital and general corporate purposes. We pay a commitment fee on the unused portions of the available funds. Borrowings under the credit facility are either due “on demand” or at maturity depending on the type of borrowing. Borrowings with “on demand” repayment terms are presented as short-term debt, while amounts due at maturity are presented as long-term debt. As of May 31, 2024, the unused capacity of \$2.00 billion was fully available to us.

Term Loans. The \$300 million term loan was paid in May 2024. Borrowings under the \$700 million term loan are available for working capital and general corporate purposes. The interest rate on our term loan was 6.33% as of May 31, 2024. The \$700 million term loan was classified as long-term debt as no repayments are scheduled to be made within the next 12 months.

Senior Notes. Borrowings under our unsecured senior notes totaling \$400 million are available for working capital and general corporate purposes. As of May 31, 2024, all notes were classified as long-term debt as no repayments are scheduled to be made within the next 12 months.

Financing Obligations. Financing obligations relate to stores subject to sale-leaseback transactions that do not qualify for sale accounting. The financing obligations were structured at varying interest rates and generally have initial lease terms ranging from 15 to 20 years with payments made monthly. We have not entered into any new sale-leaseback transactions since fiscal 2009. In the event the agreements are modified or extended beyond their original term, the related obligation is adjusted based on the present value of the revised future payments, with a corresponding change to the assets subject to these transactions. Upon modification, the amortization of the obligation is reset, resulting in more of the payments being applied to interest expense in the initial years following the modification.

Non-Recourse Notes Payable. The non-recourse notes payable relate to auto loans receivable funded through non-recourse funding vehicles. The timing of principal payments on the non-recourse notes payable is based on the timing of principal collections and defaults on the related auto loans receivable. The current portion of non-recourse notes payable represents principal payments that are due to be distributed in the following period.

Notes payable related to our asset-backed term funding transactions accrue interest predominantly at fixed rates and have scheduled maturities through December 2030, but may mature earlier, depending upon the repayment rate of the underlying auto loans receivable.

Information on our funding vehicles of non-recourse notes payable as of May 31, 2024 are as follows:

<i>(In billions)</i>	Capacity	
Warehouse facilities:		
August 2024 expiration	\$	2.30
December 2024 expiration		0.70
March 2025 expiration		3.10
Combined warehouse facility limit	\$	6.10
Unused capacity	\$	1.92
Non-recourse notes payable outstanding:		
Warehouse facilities	\$	4.18
Asset-backed term funding transactions		12.99
Non-recourse notes payable	\$	17.17

We generally enter into warehouse facility agreements for one-year terms and typically renew the agreements annually. The return requirements of warehouse facility investors could fluctuate significantly depending on market conditions. At renewal, the cost, structure and capacity of the facilities could change. These changes could have a significant impact on our funding costs.

In June 2024, we entered into a \$625 million asset-backed term funding transaction for our new non-prime securitization program. Going forward, we plan to expand our current asset-backed securitization program from a single issuance to one that more broadly incorporates the funding of CAF's receivables across distinct prime and non-prime segments. We believe this new program will enable us to fund incremental originations and support future CAF growth across the credit spectrum by creating additional funding capacity, driving additional finance income for the business over time.

See Note 4 for additional information on the related auto loans receivable.

Capitalized Interest. We capitalize interest in connection with the construction of certain facilities. For the three months ended May 31, 2024 and 2023, we capitalized interest of \$1.5 million and \$1.4 million, respectively.

Financial Covenants. The credit facility, term loan and senior note agreements contain representations and warranties, conditions and covenants. We must also meet financial covenants in conjunction with certain financing obligations. The agreements governing our non-recourse funding vehicles contain representations and warranties, as well as financial covenants and performance triggers related to events of default. As of May 31, 2024, we were in compliance with these financial covenants and our non-recourse funding vehicles were in compliance with these performance triggers.

10. Stock and Stock-Based Incentive Plans

(A) Share Repurchase Program

As of May 31, 2024, a total of \$4.0 billion of board authorizations for repurchases of our common stock was outstanding, with no expiration date, of which \$2.26 billion remained available for repurchase.

Common Stock Repurchases

	Three Months Ended May 31	
	2024	2023
Number of shares repurchased <i>(in thousands)</i>	1,445.8	—
Average cost per share	\$ 71.91	\$ —
Available for repurchase, as of end of period <i>(in millions)</i>	\$ 2,256.2	\$ 2,451.3

(B) Stock Incentive Plans

We maintain long-term incentive plans for management, certain employees and the nonemployee members of our board. The plans allow for the granting of equity-based compensation awards, including nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock awards, stock- and cash-settled restricted stock units, stock grants or a combination of awards. To date, we have not awarded any incentive stock options.

The majority of associates who receive share-based compensation awards primarily receive cash-settled restricted stock units. Senior management and other key associates receive awards of nonqualified stock options, stock-settled restricted stock units and/or restricted stock awards. Nonemployee directors are eligible to receive awards of nonqualified stock options, stock grants, stock-settled restricted stock units and/or restricted stock awards. Excluding stock grants and stock-settled deferred stock units, all share-based compensation awards, including any associated dividend rights, are subject to forfeiture.

Nonqualified Stock Options. Nonqualified stock options are awards that allow the recipient to purchase shares of our common stock at a fixed price. Stock options are granted at an exercise price equal to the fair market value of our common stock on the grant date. The stock options generally vest annually in equal amounts over four years. These options expire seven years after the date of the grant.

Cash-Settled Restricted Stock Units. Also referred to as restricted stock units, or RSUs, these are awards that entitle the holder to a cash payment equal to the fair market value of a share of our common stock for each unit granted. Conversion generally occurs annually in equal amounts over three years. However, the cash payment per RSU will not be greater than 200% or less than 75% of the fair market value of a share of our common stock on the grant date. The initial grant date fair values are based on the closing prices of our common stock on the grant dates. RSUs are liability-classified awards and do not have voting rights.

Stock-Settled Market Stock Units. Also referred to as market stock units, or MSUs, these are restricted stock unit awards with market conditions granted to eligible key associates that are converted into between zero and two shares of common stock for each unit granted. Conversion generally occurs at the end of a three-year vesting period. The conversion ratio is calculated by dividing the average closing price of our stock during the final 40 trading days of the three-year vesting period by our stock price on the grant date, with the resulting quotient capped at two. This quotient is then multiplied by the number of MSUs granted to yield the number of shares awarded. The grant date fair values are determined using a Monte-Carlo simulation and are based on the expected market price of our common stock on the vesting date and the expected number of converted common shares. MSUs do not have voting rights.

Other Share-Based Incentives

Stock-Settled Performance Stock Units. Also referred to as performance stock units, or PSUs, these are restricted stock unit awards with performance conditions granted to eligible key associates that are converted into between zero and two shares of common stock for each unit granted. Conversion generally occurs at the end of a three-year vesting period. For the fiscal 2022 grants, the first- and second-year periods of the fiscal 2023 grants and the first-year period of the fiscal 2024 grants, the conversion ratio is based on the company reaching certain performance target levels set by the board at the beginning of each

one-year period, with the resulting quotients subject to meeting a minimum 25% threshold and capped at 200%. For the third-year period of the fiscal 2023 grants, the second-year period of the fiscal 2024 grants and the fiscal 2025 grants, the conversion ratio is based on the company reaching certain target levels set by the board, with the resulting quotients subject to meeting a minimum 50% threshold and capped at 200%. These quotients are then multiplied by the number of PSUs granted to yield the number of shares awarded.

For the first year of the fiscal 2022 awards, these targets were based on annual pretax diluted earnings per share excluding any unrealized gains or losses on equity investments in private companies; the board certified a performance adjustment factor of 200%. For the second- and third-year periods of the fiscal 2022 awards, the first- and second-year periods of the fiscal 2023 awards and the first-year period of the fiscal 2024 awards, the performance targets are based on annual pretax diluted earnings per share, excluding any unrealized gains or losses on equity investments in private companies, and market share. For the second-year period of the fiscal 2022 awards and the first-year period of the fiscal 2023 awards, the board certified a performance adjustment factor of 4%. For the third-year period of the fiscal 2022 awards, the second-year period of the fiscal 2023 grants and the first-year period of the fiscal 2024 grants, the board certified a performance adjustment factor of 38%. For the third-year period of the fiscal 2023 awards and the second-year period of the fiscal 2024 awards, the performance targets are based on the annual pre-tax earnings, excluding any unrealized gains or losses on equity investments in private companies and any significant non-recurring non-cash gains or losses. For the third-year period of the fiscal 2024 awards, the remaining awarded 23,551 PSUs do not qualify as grants under ASC 718 as mutual understanding of the target performance levels are either not fully set or have not been set. For the fiscal 2025 awards, the performance targets are based on the cumulative three-year pretax earnings, excluding any unrealized gains or losses on equity investments in private companies and any significant non-recurring non-cash gains or losses.

PSUs do not have voting rights. The grant date fair values are based on the closing prices of our common stock on the grant dates. As of May 31, 2024, 296,997 units were outstanding at a weighted average grant date fair value per share of \$71.11.

Stock-Settled Deferred Stock Units. Also referred to as deferred stock units, or DSUs, these are restricted stock unit awards granted to non-employee members of our board that are converted into one share of common stock for each unit granted. Conversion occurs at the end of the one-year vesting period unless the director has exercised the option to defer conversion until separation of service to the company. The grant date fair values are based on the closing prices of our common stock on the grant dates. DSUs have no voting rights. As of May 31, 2024, 97,001 units were outstanding at a weighted average grant date fair value of \$89.80.

Restricted Stock Awards. Restricted stock awards, or RSAs, are awards of our common stock that are subject to specified restrictions that generally lapse after a one- to three-year period from the date of the grant. The grant date fair values are based on the closing prices of our common stock on the grant dates. Participants holding restricted stock are entitled to vote on matters submitted to holders of our common stock for a vote. As of May 31, 2024, there were no RSAs outstanding.

(C) Share-Based Compensation

Composition of Share-Based Compensation Expense

<i>(In thousands)</i>	Three Months Ended	
	2024	2023
Cost of sales	\$ 1,009	\$ 1,390
CarMax Auto Finance income	685	449
Selling, general and administrative expenses	47,101	35,304
Share-based compensation expense, before income taxes	\$ 48,795	\$ 37,143

Composition of Share-Based Compensation Expense – By Grant Type

	Three Months Ended	
	May 31	
	2024	2023
<i>(In thousands)</i>		
Nonqualified stock options	\$ 18,944	\$ 14,077
Cash-settled restricted stock units (RSUs)	11,390	15,111
Stock-settled market stock units (MSUs)	7,580	6,224
Other share-based incentives:		
Stock-settled performance stock units (PSUs)	10,184	741
Restricted stock (RSAs)	—	231
Employee stock purchase plan	697	759
Total other share-based incentives	\$ 10,881	\$ 1,731
Share-based compensation expense, before income taxes	\$ 48,795	\$ 37,143

Unrecognized Share-Based Compensation Expense – By Grant Type

	As of May 31, 2024	
	Unrecognized Compensation Costs	Weighted Average Remaining Recognition Life (Years)
<i>(Costs in millions)</i>		
Nonqualified stock options	\$ 55.0	2.4
Stock-settled market stock units	28.5	2.1
Other share-based incentives:		
Stock-settled performance stock units	6.8	2.4
Total other share-based incentives	6.8	2.4
Total	\$ 90.3	2.3

We recognize compensation expense for stock options, MSUs, PSUs, DSUs and RSAs on a straight-line basis (net of estimated forfeitures) over the requisite service period, which is generally the vesting period of the award. The PSU expense is adjusted for any change in management's assessment of the performance target level that is probable of being achieved. The variable expense associated with RSUs is recognized over their vesting period (net of estimated forfeitures) and is calculated based on the closing price of our common stock on the last trading day of each reporting period.

The total costs for matching contributions for our employee stock purchase plan are included in share-based compensation expense. There were no capitalized share-based compensation costs as of or for the three months ended May 31, 2024 or 2023.

Stock Option Activity

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
<i>(Shares and intrinsic value in thousands)</i>				
Outstanding as of February 29, 2024	7,393	\$ 82.03		
Options granted	1,218	\$ 67.21		
Options exercised	(138)	\$ 59.39

Stock Option Information

	Three Months Ended May 31	
	2024	2023
Options granted	1,218,305	1,491,326
Weighted average grant date fair value per share	\$ 29.18	\$ 29.1
Cash received from options exercised <i>(in millions)</i>	\$ 8.2	\$ 1.0
Intrinsic value of options exercised <i>(in millions)</i>	\$ 1.8	\$ 0.2
Realized tax benefits <i>(in millions)</i>	\$ 0.4	\$ 0.1

For stock options, the fair value of each award is estimated as of the date of grant using a binomial valuation model. In computing the value of the option, the binomial model considers characteristics of fair-value option pricing that are not available for consideration under a closed-form valuation model (for example, the Black-Scholes model), such as the contractual term of the option, the probability that the option will be exercised prior to the end of its contractual life and the probability of termination or retirement of the option holder. For this reason, we believe that the binomial model provides a fair value that is more representative of actual experience and future expected experience than the value calculated using a closed-form model. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by the recipients of share-based awards.

Assumptions Used to Estimate Option Values

	Three Months Ended May 31	
	2024	2023
Dividend yield	0.0 %	0.0 %
Expected volatility factor ⁽¹⁾	39.6 % - 46.1 %	44.1 % - 44.7 %
Weighted average expected volatility	45.4 %	44.6 %
Risk-free interest rate ⁽²⁾	4.6 % - 5.4 %	3.6 % - 5.2 %
Expected term <i>(in years)</i> ⁽³⁾	4.7	4.6

⁽¹⁾ Measured using historical daily price changes of our stock for a period corresponding to the term of the options and the implied volatility derived from the market prices of traded options on our stock.

⁽²⁾ Based on the U.S. Treasury yield curve at the time of grant.

⁽³⁾ Represents the estimated number of years that options will be outstanding prior to exercise.

11. Net Earnings Per Share

Basic net earnings per share is computed by dividing net earnings available for basic common shares by the weighted average number of shares of common stock outstanding. Diluted net earnings per share is computed by dividing net earnings available for diluted common shares by the sum of weighted average number of shares of common stock outstanding and dilutive potential common stock. Diluted net earnings per share is calculated using the “if-converted” treasury stock method.

Basic and Dilutive Net Earnings Per Share Reconciliations

	Three Months Ended	
	May 31	
	2024	2023
<i>(In thousands except per share data)</i>		
Net earnings	\$ 152,440	\$ 228,298
Weighted average common shares outstanding	157,161	158,116
Dilutive potential common shares:		
Stock options	282	164
Stock-settled stock units and awards	263	281
Weighted average common shares and dilutive potential common shares	157,706	158,561
Basic net earnings per share	\$ 0.97	\$ 1.44
Diluted net earnings per share	\$ 0.97	\$ 1.44

Certain options to purchase shares of common stock were outstanding and not included in the calculation of diluted net earnings per share because their inclusion would have been antidilutive. On a weighted average basis, for the three months ended May 31, 2024 and 2023, options to purchase 4,796,089 shares and 5,425,830 shares of common stock, respectively, were not included.

12. Accumulated Other Comprehensive Income

Changes in Accumulated Other Comprehensive Income By Component

	Net	Net	Total

Cash Flow Hedges (Note 5):		
Changes in fair value	17,509	(36,007)
Tax (expense) benefit	(4,228)	8,871
Changes in fair value, net of tax	13,281	(27,136)
Reclassifications to CarMax Auto Finance income	(14,498)	(12,564)
Tax benefit	3,532	3,063
Reclassification of hedge gains, net of tax	(10,966)	(9,501)
Net change in cash flow hedge unrecognized gains, net of tax	2,315	(36,637)
Total other comprehensive income (loss), net of tax	\$ 2,399	\$ (36,539)

Changes in the funded status of our retirement plans and changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognized in accumulated other comprehensive income. The cumulative balances are net of deferred taxes of \$20.0 million as of May 31, 2024 and \$19.3 million as of February 29, 2024.

13. Leases

Our leases primarily consist of operating and finance leases related to retail stores, office space, land and equipment. We also have stores subject to sale-leaseback transactions that do not qualify for sale accounting and are accounted for as financing obligations. For more information on these financing obligations see Note 9.

The initial term for real property leases is typically 5 to 20 years. For equipment leases, the initial term generally ranges from 3 to 8 years. Most leases include one or more options to renew, with renewal terms that can extend the lease term from 1 to 20 years or more. We include options to renew (or terminate) in our lease term, and as part of our right-of-use (“ROU”) assets and lease liabilities, when it is reasonably certain that we will exercise that option.

ROU assets and the related lease liabilities are initially measured at the present value of future lease payments over the lease term. As most of our leases do not provide an implicit rate, we use our collateralized incremental borrowing rate based on the information available at the commencement date in determining the present value of future payments. We include variable lease payments in the initial measurement of ROU assets and lease liabilities only to the extent they depend on an index or rate. Changes in such indices or rates are accounted for in the period the change occurs, and do not result in the remeasurement of the ROU asset or liability. We are also responsible for payment of certain real estate taxes, insurance and other expenses on our leases. These amounts are generally considered to be variable and are not included in the measurement of the ROU asset and lease liability. We generally account for non-lease components, such as maintenance, separately from lease components. For certain equipment leases, we apply a portfolio approach to account for the lease assets and liabilities.

Our lease agreements do not contain any material residual value guarantees or material restrictive covenants. Leases with a term of 12 months or less are not recorded on the balance sheet; we recognize lease expense for these leases on a straight-line basis over the lease term.

The components of lease expense were as follows:

<i>(In thousands)</i>	Three Months Ended May 31	
	2024	2023
Operating lease cost ⁽¹⁾	\$ 23,228	\$ 21,947
Finance lease cost:		
Depreciation of lease assets	3,822	4,535
Interest on lease liabilities	6,671	6,095
Total finance lease cost	10,493	10,630
Total lease cost	\$ 33,721	\$ 32,577

⁽¹⁾ Includes short-term leases and variable lease costs, which are immaterial.

Supplemental balance sheet information related to leases was as follows:

<i>(In thousands)</i>	Classification	As of May 31		As of February 29	
		2024		2024	
Assets:					
Operating lease assets	Operating lease assets	\$ 509,043	\$ 520,717		
Finance lease assets	Property and equipment, net ⁽¹⁾	202,052	174,998		
Total lease assets		\$ 711,095	\$ 695,715		
Liabilities:

Non-cash investing and financing activities:				
Increase (decrease) in accrued capital expenditures	\$	2,659	\$	(16,136)

See Note 13 for supplemental cash flow information related to leases.

15. Contingent Liabilities

Litigation. CarMax entities are defendants in a proceeding asserting wage and hour claims with respect to non-exempt CarMax employees in California. The asserted claims include failure to provide meal periods and rest breaks; pay statutory or contractual wages; reimburse for work-related expenses; and Private Attorneys General Act (“PAGA”) claims. On July 9, 2021, Daniel Bendure v. CarMax Auto Superstores California, LLC et al., a putative class action, was filed in the Superior Court of California, County of San Bernardino. The Bendure lawsuit seeks civil penalties for violation of the Labor Code, attorneys’ fees, costs, restitution of unpaid wages, interest, injunctive and equitable relief, general damages, and special damages. Bendure subsequently decided not to proceed with an individual or putative class claim, but rather filed and served a PAGA-only complaint in the Superior Court of California for the County of San Bernardino on December 7, 2021, based on the same allegations pled in the original complaint.

The California Supreme Court held in Adolph v. Uber that an employee who signs an arbitration agreement, as Bendure has, may still pursue a representative PAGA action in court if the employee is successful in his individual PAGA action in

arbitration. In light of this decision, Bendure filed a demand on October 16, 2023 for an individual arbitration. The parties have agreed to settle the matter for a nominal amount.

The company is a class member in a consolidated and settled class action lawsuit (In re: Takata Airbag Product Liability Litigation (U.S. District Court, Southern District of Florida)) against Toyota, Mazda, Subaru, BMW, Honda, Nissan, Ford and Volkswagen related to the economic loss associated with defective Takata airbags installed as original equipment in certain model vehicles from model years 2000-2019. In April 2020, CarMax received \$40.3 million in net recoveries from the Toyota, Mazda, Subaru, BMW, Honda and Nissan settlement funds. In January 2022, CarMax received \$3.8 million in net recoveries from the Ford settlement funds. On April 21, 2023, CarMax received \$59.3 million in net recoveries from residual undisbursed funds in the Toyota, Mazda, Subaru, BMW, Honda and Nissan settlements. On August 9, 2023, CarMax received \$7.9 million in additional residual funds in the BMW, Mazda, and Nissan settlements. CarMax remains a class member for residual funds in the Ford settlement. The Volkswagen settlement has not yet been resolved. We are unable to make a reasonable estimate of the amount or range of gain that could result from CarMax's participation in the Ford residual or Volkswagen matters.

We are involved in various other legal proceedings in the normal course of business. Based upon our evaluation of information currently available, we believe that the ultimate resolution of any such proceedings will not have a material adverse effect, either individually or in the aggregate, on our financial condition, results of operations or cash flows.

Other Matters. In accordance with the terms of real estate lease agreements, we generally agree to indemnify the lessor from certain liabilities arising as a result of the use of the leased premises, including environmental liabilities and repairs to leased property upon termination of the lease. Additionally, in accordance with the terms of agreements entered into for the sale of properties, we generally agree to indemnify the buyer from certain liabilities and costs arising subsequent to the date of the sale, including environmental liabilities and liabilities resulting from the breach of representations or warranties made in accordance with the agreements. We do not have any known material environmental commitments, contingencies or other indemnification issues arising from these arrangements.

As part of our customer service strategy, we guarantee the used vehicles we retail with a 90-day/4,000 mile limited warranty. A vehicle in need of repair within this period will be repaired free of charge. As a result, each vehicle sold has an implied liability associated with it. Accordingly, based on historical trends, we record a provision for estimated future repairs during the guarantee period for each vehicle sold. The liability for this guarantee was \$30.5 million as of May 31, 2024, and \$30.9 million as of February 29, 2024, and is included in accrued expenses and other current liabilities.

ITEM 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is provided as a supplement to, and should be read in conjunction with, our audited consolidated financial statements, the accompanying notes and the MD&A included in our Annual Report on Form 10-K for the fiscal year ended February 29, 2024 ("fiscal 2024"), as well as our unaudited interim consolidated financial statements and the accompanying notes included in Item 1 of this Form 10-Q. Note references are to the notes to unaudited interim consolidated financial statements included in Item 1. All references to net earnings per share are to diluted net earnings per share. Certain prior year amounts have been reclassified to conform to the current year's presentation. Amounts and percentages may not total due to rounding.

OVERVIEW

CarMax is the nation's largest retailer of used vehicles. We operate in two reportable segments: CarMax Sales Operations and CarMax Auto Finance ("CAF"). Our CarMax Sales Operations segment consists of all aspects of our auto merchandising and service operations, excluding financing provided by CAF. Our CAF segment consists solely of our own finance operation that provides financing to customers buying retail vehicles from CarMax.

CarMax Sales Operations

Our sales operations segment consists of retail sales of used vehicles and related products and services, such as wholesale vehicle sales; the sale of extended protection plan ("EPP") products, which include extended service plans ("ESPs") and guaranteed asset protection ("GAP"); advertising and subscription revenues; and vehicle repair service. We offer competitive, no-haggle prices; a broad selection of CarMax Quality Certified used vehicles; value-added EPP products; and superior customer service. Our omni-channel platform, which gives us the largest addressable market in the used car industry, empowers our retail customers to buy a car on their terms – online, in-store or an integrated combination of both.

Our customers finance the majority of the retail vehicles purchased from us, and availability of on-the-spot financing is a critical component of the sales process. We provide financing to qualified retail customers through CAF and our arrangements with industry-leading third-party finance providers. All of the finance offers, whether by CAF or our third-party providers, are backed by a 3-day payoff option.

As of May 31, 2024, we operated 245 used car stores in 109 U.S. television markets.

CarMax Auto Finance

In addition to third-party finance providers, we provide vehicle financing through CAF, which offers financing solely to customers buying retail vehicles from CarMax. CAF allows us to manage our reliance on third-party finance providers and to leverage knowledge of our business to provide qualifying customers a competitive financing option. As a result, we believe CAF enables us to capture additional profits, cash flows and sales. CAF income primarily reflects the interest and fee income generated by the auto loans receivable less the interest expense associated with the debt issued to fund these receivables, a provision for estimated loan losses and direct expenses. CAF income does not include any allocation of indirect costs. After the effect of 3-day payoffs and vehicle returns, CAF financed 43.3% of our retail used vehicle unit sales in the first three months of fiscal 2025. As of May 31, 2024, CAF serviced approximately 1.1 million customer accounts in its \$17.64 billion portfolio of managed receivables.

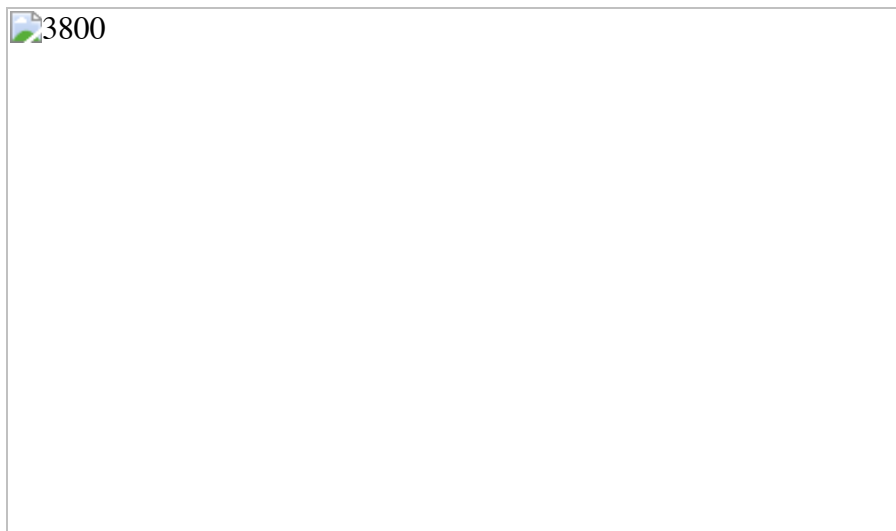

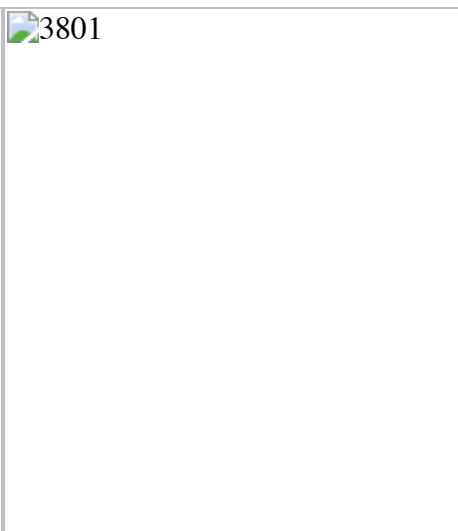

Management regularly analyzes CAF's operating results by assessing the competitiveness of our consumer offer, profitability, the performance of the auto loans receivable, including trends in credit losses and delinquencies, and CAF direct expenses.

Revenues and Profitability

The sources of revenue and gross profit from the CarMax Sales Operations segment for the first three months of fiscal 2025 are as follows:

Net Sales and Operating Revenues

Gross Profit

 3800	 3801
---	---

A high-level summary of our financial results for the first quarter of fiscal 2025 as compared to the first quarter of fiscal 2024 is as follows ⁽¹⁾:

	Three Months Ended May 31, 2024	Change from Three Months Ended May 31, 2023
<i>(Dollars in millions except per share or per unit data)</i>		
Income statement information		
Net sales and operating revenues	\$ 7,113.4	(7.5)%
Gross profit	\$ 791.9	(3.1)%
CAF income	\$ 147.0	7.0 %
Selling, general and administrative expenses	\$ 638.6	14.1 %
Net earnings	\$ 152.4	(33.2)%
Unit sales information		
Used unit sales	211,132	(3.1)%
Change in used unit sales in comparable stores	(3.8)%	N/A
Wholesale unit sales	147,685	(8.3)%
Per unit information		
Used gross profit per unit	\$ 2,347	(0.6)%
Wholesale gross profit per unit	\$ 1,064	2.1 %
SG&A as a % of gross profit	80.6 %	12.1 %
Per share information		
Net earnings per diluted share	\$ 0.97	(32.6)%
Online sales metrics		
Online retail sales ⁽²⁾	14 %	— %
Omni sales ⁽³⁾	57 %	3 %
Revenue from online transactions ⁽⁴⁾	30 %	(1)%

⁽¹⁾ Where applicable, amounts are net of intercompany eliminations.

⁽²⁾ An online retail sale is defined as a sale where the customer completes all four of the following activities remotely: reserving the vehicle; financing the vehicle, if needed; trading-in or opting out of a trade-in; and creating an online sales order.

⁽³⁾ An omni sale is defined as a sale where customers complete at least one, but not all, of the four activities listed above online.

⁽⁴⁾ Revenue from online transactions is defined as revenue from retail sales that qualify as an online retail sale, as well as any related EPP and third-party finance contribution, wholesale sales where the winning bid was taken from an online bid and all revenue earned by Edmunds.

Net earnings per diluted share during the first quarter of the prior fiscal year included a benefit of \$0.28 in connection with the receipt of settlement proceeds in a class action lawsuit related to the economic loss associated with vehicles containing Takata airbags. Refer to “Results of Operations” for further details on our revenues and profitability.

Liquidity

Our primary ongoing sources of liquidity include funds provided by operations, proceeds from non-recourse funding vehicles, and borrowings under our revolving credit facility or through other financing sources. In addition to funding our operations, this liquidity has been used to fund the repurchase of common stock under our share repurchase program and our capital expenditures.

Our current capital allocation strategy is to focus on our core business. Given our recent performance and continued market uncertainties, we are taking a conservative approach to our capital structure in order to maintain the flexibility that allows us to efficiently access the capital markets for both CAF and CarMax as a whole. We have taken steps to better align our expenses to sales as well as slowed the rate of our store growth. During the first quarter of fiscal 2025, we accelerated the pace of our share repurchases above the pace that we implemented in the third quarter of fiscal 2024. We believe we have the appropriate liquidity, access to capital and financial strength to support our operations and continue investing in our strategic initiatives for the next 12 months and thereafter for the foreseeable future.

Strategic Update and Future Outlook

Our omni-channel experience provides a common platform across all of CarMax that leverages our scale, nationwide footprint and infrastructure and empowers our customers to buy a vehicle on their terms, whether online, in-store or through an integrated combination of online and in-store experiences. While we expect our online and omni sales to grow over time, our goal is to provide the best experience whether in-store, online or a combination of the two. As a result, online, omni and in-person sales can vary from quarter to quarter depending on consumer preferences and how they choose to interact with us. We believe consumers in the used car industry will increasingly prefer to have the ability to shop and transact digitally. Approximately 70% of our customers leveraged some or all of our digital capabilities to complete their transactions during fiscal 2024, compared to approximately 40% when we completed our initial omni-channel roll-out at the end of fiscal 2020.

Our diversified business model, combined with our exceptional associates, national scale and unparalleled omni-channel experience, is a unique advantage in the used car industry that firmly positions us to drive profitable market share gains while creating shareholder value over the long-term. We expect the impact of our omni-channel capabilities will continue to grow as consumers demand a more personalized car-buying experience. Some of the recent actions we have taken to support and further differentiate our business include:

- We enhanced CAF’s ability to become a full spectrum lender, which we believe will position us to grow CAF income over time, by expanding our current asset-backed securitization program from a single issuance to one that more broadly incorporates CAF’s receivables across distinct prime and non-prime segments. We believe this will allow us to better align our offering with each investor base and ultimately generate added funding capacity.
- We enhanced our MaxOffer product, attracting dealers and expanding our vehicle sourcing capabilities. We achieved record volume each month of the quarter and are launching MaxOffer in New York during the second quarter of fiscal 2025.
- We increased used saleable inventory units while lowering total used inventory units through work-in-process reductions related to new title management capabilities and focused inventory management in non-production stores.
- We launched a number of electric vehicle (“EV”) research tools through Edmunds that help educate and build trust with consumers. We have also established test stores in California to evaluate new capabilities that support our operational readiness for increased EV sales and also enhance the customer experience.
- We achieved efficiency gains in our stores and Customer Experience Centers (“CECs”) that will scale well as we buy and sell more cars.
- We enhanced our omni-channel capabilities and are currently rolling out a new order processing system to our stores, which we anticipate will be available nationwide later this year. The system helps associates guide customers through each step of the buying journey and provides a more seamless experience for consumers who prefer to blend self-progression with assistance from associates.

In addition to these actions, we are focused on driving down our cost of sales by pursuing incremental efficiency opportunities that we have identified across our logistics network and reconditioning operations. These initiatives, which we believe will drive savings of approximately \$200 per retail unit over the next year or two, include the following:

- For logistics, we are testing a transportation management system that dispatches moves through a centralized team. The system automates communication between drivers and stores and provides new capabilities that support planning and execution.
- For reconditioning, we have identified opportunities to reduce costs through parts acquisition, bringing elements of sublet work in-house and optimizing production workflow. In addition, we believe that balancing production capacity across our stores and stand-alone reconditioning centers will drive further efficiencies and potentially enable us to take on more MaxCare work over time.

We purchased approximately 314,000 vehicles from consumers and dealers during the first quarter of fiscal 2025, down 8.6% from the prior year quarter. Of the approximately 279,000 vehicles purchased from consumers, slightly more than half were purchased through our online instant appraisal experience. Approximately 35,000 vehicles were purchased through dealers, up 70.8% from the prior year quarter, which was an all-time record. We leverage the Edmunds sales team to open new markets and sign up new dealers for MaxOffer.

While SG&A as a percent of gross profit can fluctuate from quarter to quarter depending on variability in gross profit, our initial goal on the path to strengthening our SG&A to gross profit leverage over time is to achieve a rate in the mid-70% range on an annual basis. Achieving this annual rate will require continued efficiency gains in our operating model, gross profit growth and healthier consumer demand. In fiscal 2025, we expect to require low-single-digit gross profit growth to lever SG&A.

We expect our diversified model, the scale of our operations, our investments and omni-channel strategy to provide a solid foundation for further growth. In our Annual Report on Form 10-K for fiscal 2024, we disclosed the following long-term targets:

- We are maintaining our goal to sell more than 2 million combined retail and wholesale units annually; however, we extended the timeframe to between fiscal 2026 and fiscal 2030 due to uncertainty in the timing of market recovery and as we continue to focus on profitable market share growth. We intend to update the timeframe to achieve this goal when we have greater visibility into the industry's pace of recovery.
- Given higher average selling prices, we expect to achieve the \$33 billion in annual revenue target sooner than units.
- Similarly, we also expect to achieve more than 5% nationwide market share of age 0- to 10-year old used vehicles sooner than units, but given the recent volatility in vehicle values, we will provide an updated timeframe for our expected achievement at the end of the current fiscal year.

The achievement of these targets is dependent on macroeconomic factors that could result in ongoing volatility in consumer demand.

In calendar 2023, we estimate we sold approximately 3.7% of the age 0- to 10-year old vehicles sold on a nationwide basis, a decrease from 4.0% in calendar 2022. Market share performance in calendar 2023 was negatively impacted by sharp vehicle depreciation in the used car industry and our focus on profitable market share. Based on external title data, our market share for the first quarter of calendar 2024 improved compared with the fourth quarter of calendar 2023 and was relatively consistent with the first quarter of calendar 2023. Our strategy to increase our market share includes focusing on:

- Delivering a customer-driven, omni-channel buying and selling experience that is a unique and powerful integration of our in-store and online capabilities.
- Utilizing advertising to drive customer growth, educate customers about our omni-channel platform and to differentiate and elevate our brand.
- Hiring, developing and retaining an engaged and skilled workforce.
- Leveraging data and advanced analytics to continuously improve the customer experience as well as our processes and systems.
- Improving efficiency in our stores and CECs and our logistics and reconditioning operations to reduce waste.
- Opening stores in new markets and expanding our presence in existing markets.
- Becoming the leading retailer of used EVs in the market. In support of this goal, Edmunds has launched several research and buying tools, which include providing data on the health and range of EV batteries as well as an evaluation of potential federal and state tax credits and incentives. This will support our business and help CarMax be part of the solution to reduce emissions.

As of May 31, 2024, we had used car stores located in 109 U.S. television markets, which covered approximately 85% of the U.S. population. The format and operating models utilized in our stores are continuously evaluated and may change or evolve over time based upon market and consumer expectations. During the first quarter of fiscal 2025, we opened our second stand-alone reconditioning center in Richland, Mississippi. During the remainder of the fiscal year, we plan to open five stores and one stand-alone auction facility. We are utilizing our stand-alone reconditioning and auction locations to balance capacity and drive efficiencies across the network.

While we execute both our short- and long-term strategy, there are trends and factors that could impact our strategic approach or our results in the short and medium term. For additional information about risks and uncertainties facing our company, see "Risk Factors," included in Part I. Item 1A of the Annual Report on Form 10-K for the fiscal year ended February 29, 2024.

CRITICAL ACCOUNTING ESTIMATES

For information on critical accounting policies, see "Critical Accounting Estimates" in the MD&A included in Item 7 of the Annual Report on Form 10-K for the fiscal year ended February 29, 2024.

RESULTS OF OPERATIONS – CARMAX SALES OPERATIONS

NET SALES AND OPERATING REVENUES

<i>(In millions)</i>	Three Months Ended May 31		
	2024	2023	Change
Used vehicle sales	\$ 5,677.5	\$ 6,001.5	(5.4)%
Wholesale vehicle sales	1,256.4	1,514.4	(17.0)%
Other sales and revenues:

	2024	2023	Change
Used vehicles	\$ 26,526	\$ 27,258	(2.7)%
Wholesale vehicles	\$ 8,094	\$ 9,024	(10.3)%

COMPARABLE STORE USED VEHICLE SALES CHANGES

	Three Months Ended May 31 ⁽¹⁾	
	2024	2023
Used vehicle units	(3.8)%	(11.4)%
Used vehicle revenues	(6.1)%	(16.2)%

⁽¹⁾ Stores are added to the comparable store base beginning in their fourteenth full month of operation. We do not remove renovated stores from our comparable store base. Comparable store calculations include results for a set of stores that were included in our comparable store base in both the current and corresponding prior year periods.

VEHICLE SALES CHANGES

	Three Months Ended May 31	
	2024	2023
Used vehicle units	(3.1)%	(9.6)%
Used vehicle revenues	(5.4)%	(14.4)%
Wholesale vehicle units	(8.3)%	(13.6)%
Wholesale vehicle revenues	(17.0)%	(28.5)%

USED VEHICLE FINANCING PENETRATION BY CHANNEL (BEFORE THE IMPACT OF 3-DAY PAYOFFS)

	Three Months Ended May 31 ⁽¹⁾	
	2024	2023
CAF ⁽²⁾	45.3 %	45.5 %
Tier 2 ⁽³⁾	18.7 %	20.4 %
Tier 3 ⁽⁴⁾	7.5 %	6.7 %
Other ⁽⁵⁾	28.5 %	27.4 %
Total	100.0 %	100.0 %

⁽¹⁾ Calculated as used vehicle units financed for respective channel as a percentage of total used units sold.

⁽²⁾ Includes CAF's Tier 2 and Tier 3 loan originations, which represent approximately 3% of total used units sold.

⁽³⁾ Third-party finance providers who generally pay us a fee or to whom no fee is paid.

⁽⁴⁾ Third-party finance providers to whom we pay a fee.

⁽⁵⁾ Represents customers arranging their own financing and customers that do not require financing.

CHANGE IN USED CAR STORE BASE

	Three Months Ended May 31	
	2024	2023
Used car stores, beginning of period	245	240
Store openings	—	1
Used car stores, end of period	245	241

Used Vehicle Sales. The 5.4% decrease in used vehicle revenues in the first quarter of fiscal 2025 was primarily driven by a 3.1% decrease in used unit sales and a 2.7% decrease in average retail selling price, or approximately \$700. The decrease in used units included a 3.8% decrease in comparable store used unit sales. Online retail sales, as defined previously, accounted for 14% of used unit sales for the first quarter of fiscal 2025, consistent with the prior year quarter.

During the first quarter of fiscal 2025, we believe persistent vehicle affordability challenges continued to impact our unit sales performance, as headwinds remained due to widespread inflationary pressures, higher interest rates and tightened lending standards. Comparable used unit sales improved in the second half of the first quarter and June-to-date comparable used unit sales were slightly positive.

The decrease in average retail selling price in the first quarter of fiscal 2025 reflected lower vehicle acquisition costs, partially offset by shifts in the mix of our sales by vehicle age and class.

Wholesale Vehicle Sales. Vehicles sold at our wholesale auctions are, on average, approximately 10 years old with more than 100,000 miles and are primarily comprised of vehicles purchased through our appraisal process that do not meet our retail standards. Our wholesale auction prices usually reflect trends in the general wholesale market for the types of vehicles we sell, although they can also be affected by changes in vehicle mix or the average age, mileage or condition of the vehicles being sold.

The 17.0% decrease in wholesale vehicle revenues in the first quarter of fiscal 2025 was primarily due to a decrease in average selling price of 10.3%, or approximately \$900, and an 8.3% decrease in unit sales.

The decrease in average selling price during the first quarter of fiscal 2025 was primarily due to decreased acquisition costs and shifts in the mix of our sales by vehicle age.

Other Sales and Revenues. Other sales and revenues include revenue from the sale of ESPs and GAP (collectively reported in EPP revenues, net of a reserve for estimated contract cancellations), net third-party finance (fees)/income, advertising and subscription revenues earned by our Edmunds business, and other revenues, which are predominantly comprised of service department sales. The fees we pay to the Tier 3 providers are reflected as an offset to finance fee revenues received from the Tier 2 providers. The mix of our retail vehicles financed by CAF, Tier 2 and Tier 3 providers, or customers that arrange their own financing, may vary from quarter to quarter depending on several factors, including the credit quality of applicants, changes in providers' credit decisioning and external market conditions. Changes in originations by one tier of credit providers may also affect the originations made by providers in other tiers.

Other sales and revenues increased 4.8% in the first quarter of fiscal 2025, reflecting an increase in EPP revenue. EPP revenues increased 6.9%, largely reflecting increased margins, partially offset by decreased penetration.

Seasonality. Historically, our business has been seasonal. Our stores typically experience their strongest traffic and sales in the spring and summer, with an increase in traffic and sales in February and March, coinciding with federal income tax refund season. Sales are typically slowest in the fall.

GROSS PROFIT

<i>(In millions)</i>	Three Months Ended May 31 ⁽¹⁾		
	2024	2023	Change
Used vehicle gross profit	\$ 495.5	\$ 514.6	(3.7)%
Wholesale vehicle gross profit	157.1	167.8	(6.4)%
Other gross profit	139.3	135.0	3.2 %
Total	\$ 791.9	\$ 817.4	(3.1)%

⁽¹⁾ Amounts are net of intercompany eliminations.

GROSS PROFIT PER UNIT

	Three Months Ended May 31 ⁽¹⁾			
	2024		2023	
	\$ per unit ⁽²⁾	% ⁽³⁾	\$ per unit ⁽²⁾	% ⁽³⁾
Used vehicle gross profit	\$ 2,347	8.7	\$ 2,361	8.6
Wholesale vehicle gross profit	\$ 1,064	12.5	\$ 1,042	11.1
Other gross profit	\$ 660	77.6	\$ 619	78.8

⁽¹⁾ Amounts are net of intercompany eliminations. Those eliminations had the effect of increasing used vehicle gross profit per unit and wholesale vehicle gross profit per unit and decreasing other gross profit per unit by immaterial amounts.

⁽²⁾ Calculated as category gross profit divided by its respective units sold, except the other category, which is divided by total used units sold.

⁽³⁾ Calculated as a percentage of its respective sales or revenue.

Used Vehicle Gross Profit. We target a dollar range of gross profit per used unit sold. The gross profit dollar target for an individual vehicle is based on a variety of factors, including its probability of sale and its mileage relative to its age; however, it is not primarily based on the vehicle's selling price. Our ability to quickly adjust appraisal offers to be consistent with trends in the broader trade-in market and the pace of our inventory turns reduce our exposure to the inherent continual fluctuation in used vehicle values and contribute to our ability to manage gross profit dollars per unit. Gross profit per used unit is consistent across our omni-channel platform.

We systematically adjust individual vehicle prices based on proprietary pricing algorithms in order to appropriately balance sales trends, inventory turns and gross profit achievement. Other factors that may influence gross profit include the wholesale and retail vehicle pricing environments, vehicle reconditioning and logistics costs, and the percentage of vehicles sourced directly from consumers and dealers through our appraisal process. Vehicles purchased directly from consumers and dealers generally have a lower cost per unit compared with vehicles purchased at auction or through other channels, which may generate more gross profit per unit. In any given period, our gross profit may also be impacted by the age mix of vehicles sold, as older vehicles are generally more profitable. We monitor macroeconomic factors and pricing elasticity and adjust our pricing accordingly to optimize unit sales and profitability while also maintaining a competitively priced inventory.

Used vehicle gross profit decreased 3.7% in the first quarter of fiscal 2025, driven primarily by the 3.1% decrease in total used unit sales. Used vehicle gross profit per unit for the first quarter of fiscal 2025 was in line with the prior year period. We continue to focus on striking the right balance between covering cost increases, maintaining margin and passing along efficiencies to consumers to support vehicle affordability.

Wholesale Vehicle Gross Profit. Our wholesale gross profit per unit reflects the demand for older, higher mileage vehicles, which are the mainstay of our auctions, as well as strong dealer attendance and resulting high dealer-to-car ratios at our auctions. The frequency of our auctions, which are generally held weekly or bi-weekly, minimizes the depreciation risk on these vehicles. Our ability to adjust appraisal offers in response to the wholesale pricing environment is a key factor that influences wholesale gross profit.

Wholesale vehicle gross profit decreased 6.4% in the first quarter of fiscal 2025, primarily driven by an 8.3% decrease in wholesale unit sales impacted by lower year-over-year seasonal appreciation, partially offset by a \$22 increase in wholesale vehicle gross profit per unit.

Other Gross Profit. Other gross profit includes profits related to EPP revenues, net third-party finance (fees)/income, advertising and subscription profits earned by our Edmunds business, and other revenues. Other revenues are predominantly comprised of service department operations, including used vehicle reconditioning. We have no cost of sales related to EPP revenues or net third-party finance (fees)/income, as these represent revenues paid to us by certain third-party providers. Third-party finance income is reported net of the fees we pay to third-party Tier 3 finance providers. Accordingly, changes in the relative mix of the components of other gross profit can affect the composition and amount of other gross profit.

Other gross profit increased 3.2% in the first quarter of fiscal 2025, primarily driven by an increase in EPP revenues, as discussed above.

SG&A Expenses

COMPONENTS OF SG&A EXPENSES AS A PERCENTAGE OF TOTAL SG&A EXPENSES

Three Months Ended May 31, 2024

COMPONENTS OF SG&A EXPENSES COMPARED WITH PRIOR PERIOD ⁽¹⁾

<i>(In millions except per unit data)</i>	Three Months Ended May 31		
	2024	2023	Change
Compensation and benefits:			
Compensation and benefits, excluding share-based compensation expense	\$ 328.1	\$ 330.7	(0.8)%
Share-based compensation expense	47.1	35.3	33.4 %
Total compensation and benefits ⁽²⁾	\$ 375.2	\$ 366.0	2.5 %
Occupancy costs	70.6	66.2	6.7 %
Advertising expense	71.7	71.9	(0.2)%
Other overhead costs ⁽³⁾	121.1	55.7	117.0 %
Total SG&A expenses	\$ 638.6	\$ 559.8	14.1 %
SG&A as a % of gross profit	80.6 %	68.5 %	12.1 %

⁽¹⁾ Amounts are net of intercompany eliminations.

⁽²⁾ Excludes compensation and benefits related to reconditioning and vehicle repair service, which are included in cost of sales. See Note 10 for details of share-based compensation expense by grant type.

⁽³⁾ Includes IT expenses, non-CAF bad debt, insurance, travel, charitable contributions, preopening and relocation costs and other administrative expenses.

SG&A expenses increased \$78.7 million, or 14.1%, in the first quarter of fiscal 2025. Factors contributing to the net increase include the following:

- \$65.4 million increase in other overhead costs driven by the \$59.3 million benefit in the prior year period in connection with the receipt of settlement proceeds in a class action lawsuit related to the economic loss associated with vehicles containing Takata airbags.
- \$11.8 million increase in stock-based compensation expense driven by the retirement eligibility of certain senior executives.

Excluding the legal settlement in the prior year period, SG&A expenses increased 3.1%, or \$19.5 million. SG&A expenses as a percent of gross profit increased to 80.6%, compared to 68.5% in the prior year's first quarter. Excluding the legal settlement, SG&A as a percent of gross profit was 75.7% in the prior year quarter.

Continued cost management efforts in our stores and CECs, as well as in non-CAF uncollectible receivables, drove an SG&A decrease year-over-year when excluding the prior year's legal settlement as well as the approximately \$22 million combined impact from the retirement eligibility of certain senior executives on this year's share-based compensation expense and lapping over the favorable non-CAF uncollectible receivables reserve adjustments in the prior year.

Interest Expense. Interest expense includes the interest related to short- and long-term debt, financing obligations and finance lease obligations. It does not include interest on the non-recourse notes payable, which is reflected within CAF income.

Interest expense of \$31.4 million in the first quarter of fiscal 2025 was relatively consistent with \$30.5 million in the first quarter of fiscal 2024.

Other Expense (Income). Other expense of \$0.4 million in the first quarter of fiscal 2025 was relatively consistent with \$1.2 million of other income in the first quarter of fiscal 2024.

Income Taxes. The effective income tax rate was 26.2% in the first quarter of fiscal 2025 versus 25.7% in the first quarter of fiscal 2024.

RESULTS OF OPERATIONS – CARMAX AUTO FINANCE

CAF income primarily reflects interest and fee income generated by CAF's portfolio of auto loans receivable less the interest expense associated with the debt issued to fund these receivables, a provision for estimated loan losses and direct CAF expenses. Total interest margin reflects the spread between interest and fees charged to consumers and our funding costs. Changes in the interest margin on new originations affect CAF income over time. Increases in interest rates, which affect CAF's funding costs, or other competitive pressures on consumer rates, could result in compression in the interest margin on new originations. Changes in the allowance for loan losses as a percentage of ending managed receivables reflect the effect of changes in loss and delinquency experience and economic factors on our outlook for net losses expected to occur over the remaining contractual life of the loans receivable as well as changes in the mix of credit quality originated.

CAF's managed portfolio is composed primarily of loans originated over the past several years. Trends in receivable growth and interest margins primarily reflect the cumulative effect of changes in the business over a multi-year period. Historically, we have sought to originate loans in our core portfolio, which excludes Tier 2 and Tier 3 originations, with an underlying risk profile that we believe will, in the aggregate, result in cumulative net losses in the 2% to 2.5% range (excluding CECL-required recovery costs) over the life of the loans. Actual loss performance of the loans may fall outside of this range based on various factors, including intentional changes in the risk profile of originations, economic conditions and wholesale recovery rates. Current period originations reflect current trends in both our retail sales and the CAF business, including the volume of loans originated, current interest rates charged to consumers, loan terms and average credit scores. Loans originated in a given fiscal period impact CAF income over time, as we recognize income over the life of the underlying auto loan.

CAF also originates a small portion of auto loans to customers who typically would be financed by our Tier 2 and Tier 3 finance providers, in order to better understand the performance of these loans, mitigate risk and add incremental profits. The targeted percentage of Tier 2 and Tier 3 originations has fluctuated over the past several years. CAF currently targets originating less than 5% of the total Tier 3 loan volume. Within the Tier 2 space, CAF continues to originate loans on a test basis and we slightly increased our investment in this space during the prior fiscal year. Any future adjustments in Tier 2 and Tier 3 will consider the broader lending environment, which includes funding availability, along with the long-term sustainability of the change. These loans have higher loss and delinquency rates than the remainder of the CAF portfolio, as well as higher contract rates.

CAF is expanding its current asset-backed securitization program from a single issuance to one that more broadly incorporates CAF's receivables across distinct prime and non-prime segments, with prime generally representing FICO scores greater than 650 and non-prime generally representing FICO scores below 650. We believe this strategy will enable CAF to efficiently fund incremental originations and support future CAF growth across the credit spectrum by creating additional funding capacity, driving additional finance income for the business over time. In June 2024, CAF closed on its first non-prime securitization deal. We would expect each additional percentage point of CAF penetration to generate \$10 million to \$12 million in lifetime pre-tax income per year of origination, net of the impact to finance partner participation fees. Our pre-tax income expectations will be impacted by the volume of loans originated, interest rates charged to customers, loan terms, loss rates, average credit scores and the broader macroeconomic and lending environments. While this income is earned over time, the provision for lifetime losses is recognized at the time of origination. We believe our unique finance platform with a full-spectrum in-house lending operation, coupled with a robust network of partner lenders, will strengthen our competitive advantage.

CAF income does not include any allocation of indirect costs. Although CAF benefits from certain indirect overhead expenditures, we have not allocated indirect costs to CAF to avoid making subjective allocation decisions. Examples of indirect costs not allocated to CAF include retail store expenses and corporate expenses.

See Note 3 for additional information on CAF income and Note 4 for information on auto loans receivable, including credit quality.

SELECTED CAF FINANCIAL INFORMATION

<i>(In millions)</i>	Three Months Ended May 31			
	2024	% ⁽¹⁾	2023	% ⁽¹⁾
Interest margin:				
Interest and fee income	\$ 452.5	10.3	\$ 400.5	9.4

Provision for loan losses	\$ (81.2)	(1.9)	\$ (80.9)	(1.9)
CarMax Auto Finance income	\$ 147.0	3.3	\$ 137.4	3.2

⁽¹⁾ Annualized percentage of total average managed receivables.

CAF ORIGINATION INFORMATION (AFTER THE IMPACT OF 3-DAY PAYOFFS)

	Three Months Ended May 31	
	2024	2023
Net loans originated <i>(in millions)</i>	\$ 2,265.7	\$ 2,340.4
Vehicle units financed	91,364	93,050
Net penetration rate ⁽¹⁾	43.3 %	42.7 %
Weighted average contract rate	11.4 %	11.1 %
Weighted average credit score ⁽²⁾	721	715
Weighted average loan-to-value (LTV) ⁽³⁾	89.1 %	87.9 %
Weighted average term <i>(in months)</i>	67.0	65.3

⁽¹⁾ Vehicle units financed as a percentage of total used units sold.

⁽²⁾ The credit scores represent FICO® scores and reflect only receivables with obligors that have a FICO® score at the time of application. The FICO® score with respect to any receivable with co-obligors is calculated as the average of each obligor's FICO® score at the time of application. FICO® scores are not a significant factor in our primary scoring model, which relies on information from credit bureaus and other application information as discussed in Note 4. FICO® is a federally registered servicemark of Fair Isaac Corporation.

⁽³⁾ LTV represents the ratio of the amount financed to the total collateral value, which is measured as the vehicle selling price plus applicable taxes, title and fees.

LOAN PERFORMANCE INFORMATION

<i>(In millions)</i>	As of and for the Three Months Ended May 31	
	2024	2023
Total ending managed receivables	\$ 17,641.6	\$ 17,190.6
Total average managed receivables	\$ 17,551.2	\$ 17,003.4
Allowance for loan losses	\$ 493.1	\$ 535.4
Allowance for loan losses as a percentage of ending managed receivables	2.79 %	3.11 %
Net credit losses on managed receivables	\$ 70.9	\$ 52.7
Annualized net credit losses as a percentage of total average managed receivables	1.62 %	1.24 %
Past due accounts as a percentage of ending managed receivables	5.38 %	5.15 %
Average recovery rate ⁽¹⁾	48.9 %	59.2 %

⁽¹⁾ The average recovery rate represents the average percentage of the outstanding principal balance we receive when a vehicle is repossessed and liquidated, generally at our wholesale auctions. While in any individual period conditions may vary, over the past 10 fiscal years, the annual recovery rate has ranged from a low of 46% to a high of 71%, and it is primarily affected by the wholesale market environment.

- CAF Income (Increase of \$9.6 million, or 7.0%, in the first quarter of fiscal 2025)
 - The increase in CAF income for the first quarter of fiscal 2025 reflects an increase in average managed receivables and an increase in the net interest margin percentage.
- Total Interest Margin (Increased slightly to 6.2% in the first quarter of fiscal 2025 from 6.1% in the first quarter of fiscal 2024)
 - The increase in the total interest margin percentage for the first quarter of fiscal 2025 was primarily driven by higher consumer rates as well as the effects of swaps not designated as hedges for accounting purposes, partially offset by higher funding costs.
- Provision for Loan Losses
 - The current quarter provision of \$81.2 million was relatively consistent with \$80.9 million in the prior year period.
 - The allowance for loan losses as a percentage of ending managed receivables was 2.79% as of May 31, 2024, compared with 3.11% as of May 31, 2023 and 2.78% as of February 29, 2024. The allowance percentage remained consistent with February primarily due to CAF's expanded investment in Tier 2, partially offset by the previously implemented tightened underwriting standards in response to the current environment.
- Loan Performance
 - The decline in net loan originations in the first quarter of fiscal 2025 resulted from decreases in used unit sales and the average amount financed, partially offset by an increase in the net penetration rate.
 - CAF net penetration in the first quarter of fiscal 2025 increased compared to the prior year period, primarily reflecting changes in the underlying credit mix of customers applying for financing.
 - The weighted average contract rate increased to 11.4% in the first quarter of fiscal 2025 compared with 11.1% in the first quarter of fiscal 2024. The increase was primarily due to the expansion of Tier 2 originations within CAF's portfolio.
 - The year-over-year increase in past due accounts as a percentage of ending managed receivables in the first quarter of fiscal 2025 reflects an increase in delinquencies as well as our expansion of Tier 2 originations within CAF's portfolio. The increase in delinquencies primarily reflects customer hardship in the current economic environment.

PLANNED FUTURE ACTIVITIES

During the first quarter of fiscal 2025, we opened one stand-alone reconditioning center. For the remainder of fiscal 2025, we anticipate opening five new store locations and one stand-alone auction facility. We currently estimate capital expenditures will total between \$500 million and \$550 million in fiscal 2025. Capital expenditures were \$465.3 million in fiscal 2024. Planned capital spending in fiscal 2025 largely consists of spending to support our future long-term growth in stand-alone reconditioning and auction facilities, as well as our new stores.

FINANCIAL CONDITION

Liquidity and Capital Resources

Our primary ongoing cash requirements are to fund our existing operations, store expansion and improvement, CAF and strategic growth initiatives. Since fiscal 2013, we have also elected to use cash for our share repurchase program. Our primary ongoing sources of liquidity include funds provided by operations, proceeds from non-recourse funding vehicles and borrowings under our revolving credit facility or through other financing sources.

Our current capital allocation strategy is to focus on our core business. Given our recent performance and continued market uncertainties, we are taking a conservative approach to our capital structure in order to maintain the flexibility that allows us to efficiently access the capital markets for both CAF and CarMax as a whole. We have taken steps to better align our expenses to sales as well as slowed the rate of our store growth. During the first quarter of fiscal 2025, we accelerated the pace of our share repurchases above the pace that we implemented in the third quarter of fiscal 2024. We believe we have the appropriate liquidity, access to capital and financial strength to support our operations and continue investing in our strategic initiatives for the next 12 months and thereafter for the foreseeable future.

We have historically managed leverage based on a number of factors, including internal financial forecasts, consideration of CAF's operational and capital needs, external peer benchmarking, requirements of our debt agreements and macroeconomic conditions. Generally, we expect to use our revolving credit facility and other financing sources, together with stock repurchases, to maintain a leverage profile that ensures operating flexibility while supporting continued investment in the business.

Operating Activities. During the first three months of fiscal 2025, net cash used in operating activities totaled \$117.7 million compared with \$185.3 million in the prior year period.

As of May 31, 2024, total inventory was \$3.77 billion, representing an increase of \$94.8 million compared with the balance as of the start of the fiscal year. The increase was primarily due to an increase in the average carrying cost of inventory due to market appreciation and an increase in saleable vehicle units.

Our operating cash flows are significantly impacted by changes in auto loans receivable, which increased \$337.7 million in the current year period compared with \$484.0 million in the prior year period. The majority of the changes in auto loans receivable are accompanied by changes in non-recourse notes payable, which are issued to fund auto loans originated by CAF. Net issuances of non-recourse notes payable were \$299.6 million in the current year period compared with \$419.7 million in the prior year period and are separately reflected as cash from financing activities. Due to the presentation differences between auto loans receivable and non-recourse notes payable on the consolidated statements of cash flows, fluctuations in these amounts can have a significant impact on our operating and financing cash flows without affecting our overall liquidity, working capital or cash flows.

The change in net cash used in operating activities for the first three months of the current fiscal year compared with the prior year period primarily reflected the changes in inventory and auto loans receivable, as discussed above, partially offset by the net impact of volume and timing-related changes in accounts receivable and accounts payable as well as a decrease in net earnings when excluding non-cash expenses, which include depreciation and amortization, share-based compensation expense and the provisions for loan losses and cancellation reserves.

Investing Activities. During the first three months of fiscal 2025, net cash used in investing activities totaled \$105.9 million compared with \$136.8 million in fiscal 2024. Capital expenditures were \$103.9 million in the current year period versus \$136.7 million in the prior year period. Capital expenditures primarily included land purchases and construction costs to support our growth capacity initiatives and new store openings as well as investments in technology. We maintain a multi-year pipeline of sites to support our store and capacity growth, so portions of capital spending in one year may relate to locations that we open in subsequent fiscal years.

As of May 31, 2024, 162 of our 245 used car stores were located on owned sites and 83 were located on leased sites, including 27 land-only leases and 56 land and building leases.

Financing Activities. During the first three months of fiscal 2025, net cash used in financing activities totaled \$112.4 million compared with net cash provided by financing activities of \$306.6 million in the prior year period. Included in these amounts were net issuances of non-recourse notes payable of \$299.6 million compared with \$419.7 million in the prior year period. Non-recourse notes payable are typically used to fund changes in auto loans receivable (see “Operating Activities”).

During the first three months of fiscal 2025, cash used in financing activities was impacted by net payments on our long-term debt of \$303.1 million as well as stock repurchases of \$106.9 million. During the first three months of fiscal 2024, cash provided by financing activities was impacted by net payments on our long-term debt of \$102.8 million.

TOTAL DEBT AND CASH AND CASH EQUIVALENTS

(In thousands)

Debt Description ⁽¹⁾	Maturity Date	As of May 31 2024	As of February 29 2024
Revolving credit facility ⁽²⁾	June 2028	\$ —	\$ —
Term loan ⁽²⁾	June 2024	—	300,000
Term loan ⁽²⁾	October 2026	699,668	699,633
4.17% Senior notes	April 2026	200,000	200,000
4.27% Senior notes	April 2028	200,000	200,000
Financing obligations	Various dates through February 2059	513,707	516,544
Non-recourse notes payable	Various dates through December 2030	17,166,525	16,866,972
Total debt ⁽³⁾		\$ 18,779,900	\$ 18,783,149
Cash and cash equivalents		\$ 218,931	\$ 574,142

⁽¹⁾ Interest is payable monthly, with the exception of our senior notes, which are payable semi-annually.

⁽²⁾ Borrowings accrue interest at variable rates based on SOFR, the federal funds rate, or the prime rate, depending on the type of borrowing.

⁽³⁾ Total debt excludes unamortized debt issuance costs. See Note 9 for additional information.

Borrowings under our \$2.00 billion unsecured revolving credit facility are available for working capital and general corporate purposes, and the unused portion is fully available to us. The credit facility, term loan and senior note agreements contain representations and warranties, conditions and covenants. If these requirements are not met, all amounts outstanding or otherwise owed could become due and payable immediately and other limitations could be placed on our ability to use any available borrowing capacity. As of May 31, 2024, we were in compliance with these financial covenants.

See Note 9 for additional information on our revolving credit facility, term loans, senior notes and financing obligations.

CAF auto loans receivable are primarily funded through our warehouse facilities and asset-backed term funding transactions. These non-recourse funding vehicles are structured to legally isolate the auto loans receivable, and we would not expect to be able to access the assets of our non-recourse funding vehicles, even in insolvency, receivership or conservatorship proceedings. Similarly, the investors in the non-recourse notes payable have no recourse to our assets beyond the related receivables, the amounts on deposit in reserve accounts and the restricted cash from collections on auto loans receivable. We do, however, continue to have the rights associated with the interest we retain in these non-recourse funding vehicles.

As of May 31, 2024, \$12.99 billion and \$4.18 billion of non-recourse notes payable were outstanding related to asset-backed term funding transactions and our warehouse facilities, respectively. During the first three months of fiscal 2025, we funded a total of \$1.60 billion in asset-backed term funding transactions. As of May 31, 2024, we had \$1.92 billion of unused capacity in our warehouse facilities.

We have periodically increased our warehouse facility limit over time, as our store base, sales and CAF loan originations have grown. See Note 9 for additional information on the warehouse facilities.

We generally repurchase the receivables funded through our warehouse facilities when we enter into an asset-backed term funding transaction. If our counterparties were to refuse to permit these repurchases it could impact our ability to execute on our funding program. Additionally, the agreements related to the warehouse facilities include various representations and warranties, as well as covenants and performance triggers related to events of default. If these requirements are not met, we could be unable to continue to fund receivables through the warehouse facilities. In addition, warehouse facility investors could charge us a higher rate of interest and could have us replaced as servicer. Further, we could be required to deposit collections on the related receivables with the warehouse facility agents on a daily basis and deliver executed lockbox agreements to the warehouse facility agents.

The timing and amount of stock repurchases are determined based on stock price, market conditions, legal requirements and other factors. Shares repurchased are deemed authorized but unissued shares of common stock. As of May 31, 2024, a total of \$4 billion of board authorizations for repurchases was outstanding, with no expiration date, of which \$2.26 billion remained available for repurchase. See Note 10 for more information on share repurchase activity.

Fair Value Measurements

We recognize money market securities, mutual fund investments, certain equity investments and derivative instruments at fair value. See Note 6 for more information on fair value measurements.

FORWARD-LOOKING STATEMENTS

We caution readers that the statements contained in this report that are not statements of historical fact, including statements about our future business plans, operations, challenges, opportunities or prospects, including without limitation any statements or factors regarding expected operating capacity, sales, inventory, market share, financial targets, revenue, margins, expenses, liquidity, loan originations, capital expenditures, share repurchase plans, debt obligations or earnings, are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. You can identify these forward-looking statements by the use of words such as “anticipate,” “believe,” “could,” “enable,” “estimate,” “expect,” “intend,” “may,” “outlook,” “plan,” “positioned,” “predict,” “should,” “target,” “will” and other similar expressions, whether in the negative or affirmative. Such forward-looking statements are based upon management’s current knowledge, expectations and assumptions and involve risks and uncertainties that could cause actual results to differ materially from anticipated results. We disclaim any intent or obligation to update these statements. Among the factors that could cause actual results and outcomes to differ materially from those contained in the forward-looking statements are the following:

- Changes in the competitive landscape and/or our failure to successfully adjust to such changes.
- Changes in general or regional U.S. economic conditions, including inflationary pressures, climbing interest rates and the potential impact of international events.
- Changes in the availability or cost of capital and working capital financing, including changes related to the asset-backed securitization market.
- Events that damage our reputation or harm the perception of the quality of our brand.
- Significant changes in prices of new and used vehicles.
- A reduction in the availability of or access to sources of inventory or a failure to expeditiously liquidate inventory.
- Our inability to realize the benefits associated with our omni-channel platform.
- Factors related to geographic and sales growth, including the inability to effectively manage our growth.
- Our inability to recruit, develop and retain associates and maintain positive associate relations.
- The loss of key associates from our store, regional or corporate management teams or a significant increase in labor costs.
- Changes in economic conditions or other factors that result in greater credit losses for CAF’s portfolio of auto loans receivable than anticipated.
- The failure or inability to realize the benefits associated with our strategic investments.
- Changes in consumer credit availability provided by our third-party finance providers.
- Changes in the availability of extended protection plan products from third-party providers.
- The performance of the third-party vendors we rely on for key components of our business.
- Adverse conditions affecting one or more automotive manufacturers, and manufacturer recalls.
- The inaccuracy of estimates and assumptions used in the preparation of our financial statements, or the effect of new accounting requirements or changes to U.S. generally accepted accounting principles.
- The failure or inability to adequately protect our intellectual property.
- The occurrence of severe weather events.
- The failure or inability to meet our environmental goals or satisfy related disclosure requirements.
- Factors related to the geographic concentration of our stores.
- Security breaches or other events that result in the misappropriation, loss or other unauthorized disclosure of confidential customer, associate or corporate information.
- The failure of or inability to sufficiently enhance key information systems.

- Factors related to the regulatory and legislative environment in which we operate.
- The effect of various litigation matters.
- The volatility in the market price for our common stock.

For more details on factors that could affect expectations, see Part II, Item 1A, “Risk Factors” on Page 46 of this report, our Annual Report on Form 10-K for the fiscal year ended February 29, 2024, and our quarterly or current reports as filed with or furnished to the U.S. Securities and Exchange Commission (“SEC”). Our filings are publicly available on our investor information home page at investors.carmax.com. Requests for information may also be made to our Investor Relations Department by email to investor_relations@carmax.com or by calling 1-804-747-0422, ext. 7865. We undertake no obligation to update or revise any forward-looking statements after the date they are made, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There have been no material changes to our market risk since February 29, 2024. For information on our exposure to market risk, refer to Part II, Item 7A, “Quantitative and Qualitative Disclosures about Market Risk,” contained in our Annual Report on Form 10-K for the fiscal year ended February 29, 2024.

Item 4. Controls and Procedures

Disclosure. We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (“Exchange Act”)) that are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Our disclosure controls and procedures are also designed to ensure that this information is accumulated and communicated to management, including the chief executive officer (“CEO”) and the chief financial officer (“CFO”), as appropriate to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, with the participation of the CEO and CFO, we evaluated the effectiveness of our disclosure controls and procedures. Based upon that evaluation, the CEO and CFO concluded that our disclosure controls and procedures were effective as of the end of the period.

Internal Control over Financial Reporting. There was no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the quarter ended May 31, 2024, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For a discussion of certain legal proceedings, see Note 15 to the consolidated financial statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Item 1A. Risk Factors

In connection with information set forth in this Form 10-Q, the factors discussed under “Risk Factors” in our Form 10-K for fiscal year ended February 29, 2024, should be considered. These risks could materially and adversely affect our business, financial condition, and results of operations. There have been no material changes to the factors discussed in our Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On October 23, 2018, the board authorized the repurchase of up to \$2 billion of our common stock with no expiration date. In April 2022, the board increased our share repurchase authorization by \$2 billion. Purchases may be made in open market transactions, including through Rule 10b5-1 plans, or privately negotiated transactions at management’s discretion and the timing and amount of repurchases are determined based on stock price, market conditions, legal requirements and other factors. Shares repurchased are deemed authorized but unissued shares of common stock.

The following table provides information relating to the company’s repurchase of common stock for the first quarter of fiscal 2025. The table does not include transactions related to employee equity awards or exercise of employee stock options.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program
March 1 - 31, 2024	172,500	\$ 82.18	172,500	\$ 2,345,971,488
April 1 - 30, 2024	441,556	\$ 71.38	441,556	\$ 2,314,451,080
May 1 - 31, 2024	831,734	\$ 70.06	831,734	\$ 2,256,180,541
Total	1,445,790		1,445,790
